

TACTILIS TAKES TOP HONOURS AT FROST & SULLIVAN INVESTOR TECHVISION FORUM

26th October 2015

SINGAPORE. Tactilis Pte. Limited, manufacturers of a new biometric computer card, recently won “Best Start Up Company” at the Frost & Sullivan GIL 2015: Asia Pacific event which took place at the Conrad Centennial Singapore on the 15th October 2015. The event was attended by over 300 business leaders and government representatives from across the region to discuss the current status and future of digital transformation.

A key highlight of the day’s programme was the **Investor Techvision Forum 2015** - a Dragon’s Den style showcase of innovative technologies, products, or services competing to find Singapore’s ‘Champion Start Up’. Tactilis participated as one of five quality start-up companies that Frost & Sullivan researched and felt had the business potential to make national and international impact.

Each company presented its product summary and business model followed by Q&A session from the appointed panel of judges that included, Aroop Zutshi (Global President & Managing Partner, Frost & Sullivan), Deepak Natarajan (Director, Intel Capital), Azeem M. Azimuddin (CFO & Advisor to Chairman, Aya Bank Ltd., Myanmar) and Peter Lundie (Managing Partner, Agent3).

Tactilis Founder & CEO, Michael Gardiner, presented the computer card, its applications across a number of key industries and explained how Tactilis could play a significant role in identity verification and personal data protection.

The judges deliberated all five pitches for over half an hour before declaring that they “had reached a unanimous decision”. Head of the forum judging panel, Azeem M. Azimuddin concluded, “If you have a product in your pocket that allows highly secure transactions whilst eliminating five other products in your pocket, you really have a powerful proposition” before announcing Tactilis as the 2015 winners and presenting the prize check of SGD 2,500.

Tactilis Founder & CEO, Michael Gardiner later said, “We are delighted that the potential of our biometric card to make a major impact in the global security space was recognized by such an esteemed forum.”
